

# CLIP INS

14"16",18", 20",22"

## How To Apply:

- 1.) Open all clips so they are ready to be installed. Create a part with a tail comb and secure the top half of your hair up to keep it out of the way as you clip in the tracks.
- 2.) For the back, use the widest quad track and tease a center piece below the part to secure the middle clip shut, follow with other 2 clips on each end of the track.
- 3.) For the side pieces, part your hair about 1 inch above your ear and begin clipping closest clip to your face first. Style as desired!

## How To Customize Size/ Add Tracks:

- 1.) Take one of your two side track and lay it flat with the clips facing up.
- 2.) Using sharp scissors cut in-between two clips. Avoid cutting at an angle.
- 3.) To further customize your set you can cut one or both side tracks into 3 individual sections.
