

CROWN TOPPER □

16 □

How to Prepare:

- 1.) Lightly dampen the hair with a spray bottle, concentrating on the rooting of the area where you desire your parting.
- 2.) Separate the damp hair at your desired part by combing downward on each side of the part.
- 3.) Using a concentrator nozzle, blow-dry hair in the direction of the parting.
- 4.) To fluff up the hair after establishing the part, blow-dry the hair piece upside down, back and forth until completely dry. Style as desired!

How To Apply:

- 1.) Tease a one inch section of hair where you want to attach the front clip about 1-1.5 inches from your hairline to match your natural part. Scoop the front clip into this section to make it flush to your scalp.
- 2.) To attach the other clips, **DO NOT** tease the hair underneath the clips. Holding both sides at once, scoop and lock the clips to secure them shut.
- 3.) Scoop and secure the back clip without teasing hair underneath.
